

Numbering Resource Utilization/Forecast (NRUF) Service Provider Training

September 12, 2024

Agenda

- ❑ NRUF Reporting
- ❑ NRUF Filing Preparation Checklist
- ❑ NANP Administration System (NAS)
 - NRUF Form 502 Online Filing (Geographic/Non-Geographic)
 - NAS NRUF Reports
- ❑ Questions

NRUF Reporting

NRUF Reporting is Mandatory per FCC

- All Service Providers (SPs) that receive resources from NANPA must report utilization and forecast data to NANPA
- SPs must file semi-annually on or before February 1 for geographic and non-geographic resources assigned as of December 31 and on or before August 1 for resources assigned as of June 30
- Filing Methods: Web-Based User Interface (NAS), Secure File Transfer Protocol (SFTP), Application Programming Interface (API)
- SPs will be sent an email response to all filing methods which will include any errors that need to be corrected

NRUF Filing Preparation Checklist

During the months of June and December:

- Review Central Office (CO) codes and/or thousands-blocks assigned to your Operating Company Number (OCN) using the CO Code Utilized Report and the Thousands-Block Report on the NANPA website (www.nanpa.com)
- Identify contacts within your company who can provide utilization and forecast data
- Review and select filing method (NAS, SFTP, API)
- Take a “snapshot” of the status of your telephone number inventory on June 30 and December 31

During the months of July and January:

- Based on the “snapshot” of usage data as of June 30 and December 31, enter the quantity of TNs for each usage category: Assigned, Intermediate, Reserved, Aging, and Administrative. Select the applicable utilization worksheets (U1, U2 etc.)
- Collect and finalize the forecast data and select applicable forecast forms (F1a, F1b, etc.)
- When NRUF submission is accepted, run the NRUF Utilization Missing Report and NRUF Donation Discrepancy Report in NAS.

NRUF Filing Preparation Checklist

After the February 1st and August 1st Filing Deadlines:

- NANPA will notify service providers who fail to file for some or all of their numbering resources. Please comply with the missing utilization or anomalous notifications you receive.
- When requesting new resources where you do not have an NRUF forecast on file, update your forecast prior to requesting new resources to avoid “No NRUF on File” errors when submitting your application for resources to NANPA.
