

## 209 NPA (California) Final Jeopardy Procedures

**NANPA has declared this NPA to be in a jeopardy situation. The final Jeopardy Procedures have been implemented and codes will be rationed as described below.**

Twenty (**20**) Central Office (CO) Codes will be set aside for pooling CO Code applications. Only non-pooled CO Code applications shall continue in the monthly lottery. The monthly allocation is set at **2** codes per month.

Two requests per OCN can be submitted each month. If two or less Part 1 requests are submitted within the submission timeframe that month than each request receives a CO code. Any part of the base allocation of two that is not assigned in a rationing month will NOT carryover for assignment in the following month. If more than two Part 1 requests are submitted within the submission timeframe that month, the codes will be assigned via a lottery to take place no later than the 10th business day of the month. All requests not assigned via the lottery will be denied. Code requests that do not receive a code allocation in the current month will be denied and the applicant must submit a new application request for future month’s allocation.

**Trigger:**

NANPA will reconvene the industry to revisit the jeopardy procedures when the remaining pooling set-asides reaches **7** or the total number of CO codes available for assignment reaches **30**.
