

**NPA 202 (District Of Columbia)
Interim Jeopardy Procedures**

NANPA has declared this NPA to be in a jeopardy situation. Therefore, Interim Jeopardy Procedures have been invoked and codes will be rationed as described below. CO code allocations will initially be set at three per month. Pooling CO code requests will be entered in the lottery along with non-pooled requests until final jeopardy procedures can be established.

If three or less Part 1 requests are submitted within the submission timeframe that month then each request receives a CO code. Any part of the base allocation of three that is not assigned in a rationing month will NOT carryover for assignment in the following month (“monthly assignable”). If more than three Part 1 requests are submitted within the submission timeframe that month, the codes will be assigned via a lottery to take place no later than the 10th business day of the month. All requests not assigned via the lottery will be denied.

These Interim Procedures do not address the full range of NPA jeopardy code management issues; they are intended to be used on a short-term basis only. The "final" Code Conservation Measures developed by the industry will have to include the number of codes allocated per month and whether pooling set aside CO codes should be established.

Expanded long-term procedures will be required to ensure that all industry members (existing code holders as well as potential code applicants) understand the rules and requirements that will apply until a new ("relief") NPA is implemented.
