Subject: Introduction of Interchangeable Central Office Codes in Nebraska

NANPA Central Office Code Administration advises that central office codes in the N0/1X format (where N = digits 2 through 9, and X = digits 0 through 9) will be introduced in Nebraska NPAs 308 and 402 beginning December 1, 1998, due to the dwindling number of central office codes available for assignment in NNX format. Although the capability to process these interchangeable central office codes was added in 1995 throughout the area served by the North American Numbering Plan, there has been no need to assign these codes in Nebraska prior to this point.

Questions concerning this notice of the introduction of interchangeable central office codes should be directed to Joanne Edelman at 925-363-8710. Questions concerning code requests should be made to Paula Husted, NANPA Code Administrator, at 925-363-8706.
