

NORTH AMERICAN NUMBERING PLAN PLANNING LETTER

Number: PL-NANP-149

Date: January 25, 1999

From: NANPA

Subject: NANP- Overlay of 408 Numbering Plan Area (NPA) with 669 NPA - California

Substantial number growth in Northern California necessitates providing additional area code relief for the 408 NPA. The relief plan, approved by the California Public Utilities Commission (CPUC) in Decision 98-11-065 dated November 19, 1998, calls for a single comprehensive overlay of the existing 408 NPA.

The new 669 NPA will cover the same geographic area as the existing 408 NPA, including such communities as Sunnyvale, Milpitas, Santa Clara City, Cupertino, Saratoga, Campbell, San Antonio Valley, San Jose, Los Gatos, Morgan Hill, San Martin and Gilroy.

In preparation for the introduction of the overlay code and mandatory 1+10 digit dialing, a permissive dialing period will begin on January 1, 1999, during which subscribers will be encouraged to dial 1+10 digits (i.e. 1 + NPA + NXX + XXXX) for all local, extended area service, and toll calls both within and between the 408 and 669 NPAs. Beginning October 1, 1999, at 12:01 a.m. (PT) all local, extended area service and toll calls within and between NPAs involved in the overlay will require 1+10 digits. Implementation of the 669 NPA will be on January 1, 2000, at 12:01 a.m. (PT).

The **attached map** illustrates the 408 and 669 NPA configuration after the overlay.

After the beginning of mandatory 1+10 digit dialing on October 1, 1999, the dialing plan for the 408 and 669 NPAs will be as follows:

- All home NPA (HNPA) local calls and Extended Area Service (EAS) calls, and toll calls within the 408 and 669 NPAs will be dialed with a prefix “1” and 10 digits, i.e., 1 + HNPA + NXX + XXXX (1+10 digits).
- All foreign NPA (FNPA) local calls, Extended Area Service (EAS) calls, and toll calls outside the 408 and 669 NPAs will be dialed with a prefix “1” and 10 digits, i.e., 1 + FNPA + NXX + XXXX (1+10 digits).

- All operator assisted calls, including credit card, collect, and third party calls, will be dialed with a “0” prefix and 10 digits, i.e. 0 + NPA + NXX + XXXX (0+10 digits).

All international and domestic carriers are asked to ensure that the new 669 NPA has been activated throughout their networks prior to November 20, 1999. Test calls to verify routing to the new NPA code can be made by dialing 669-777-0669, effective November 20, 1999. Calls successfully completed to the test number will receive a recorded announcement. The test number will be disconnected May 20, 2000.

The special use NXX codes assigned in the 408 NPA for time service, weather, and high volume call in (HVCI) will not be duplicated in the new 669 NPA.

General questions concerning the overlay may be directed to Joe Cocke, Lockheed Martin IMS – NPA Relief Planning – Western Region at 805-492-6327. Questions of a technical nature should be directed to the NPA project coordinator of each respective service provider:
