Subject: NPA 984 To Overlay NPA 919 (North Carolina)

---

In Docket No. P-100 SUB 137b, the North Carolina Utilities Commission (NCUC) approved an all-services overlay of the 919 NPA that serves Central North Carolina. NANPA has assigned NPA code 984 for this purpose. A map showing the area served by these NPA is attached.

In preparation for the overlay, permissive (or transitory) 10-digit dialing of local calls will begin at 2:01 AM ET on August 1, 2001 and will continue until 2:01 AM ET on February 6, 2002. During the permissive period callers may dial either 7 digits or 10 digits for local calls originating in the 919 NPA. Beginning February 6, 2002 dialing 10 digits for all local calls originating or terminating in the 919 NPA is mandatory.

The dialing plan for the 919 NPA beginning February 6, 2002, is summarized below. The 984 NPA will share the same dialing plan after its introduction on March 6, 2002.

- All local calls must be dialed as 10 digits; i.e., NPA-NXX-XXXX.
- All toll calls must be dialed as 1 + 10 digits; i.e., 1-NPA-NXX-XXXX.
- Operator assisted, third party, and credit calls must be dialed as 0 + ten digits; i.e., 0-NPA-NXX-XXXX.

All international and domestic carriers should have ensured that the new 984 NPA code has been activated throughout their networks prior to February 6, 2002. Effective August 1, 2001, test calls to verify routing to the new NPA can be made by dialing 984-321-2002. Calls successfully completed to the test number will receive a recorded announcement. The test number will be disconnected no earlier than April 6, 2002.

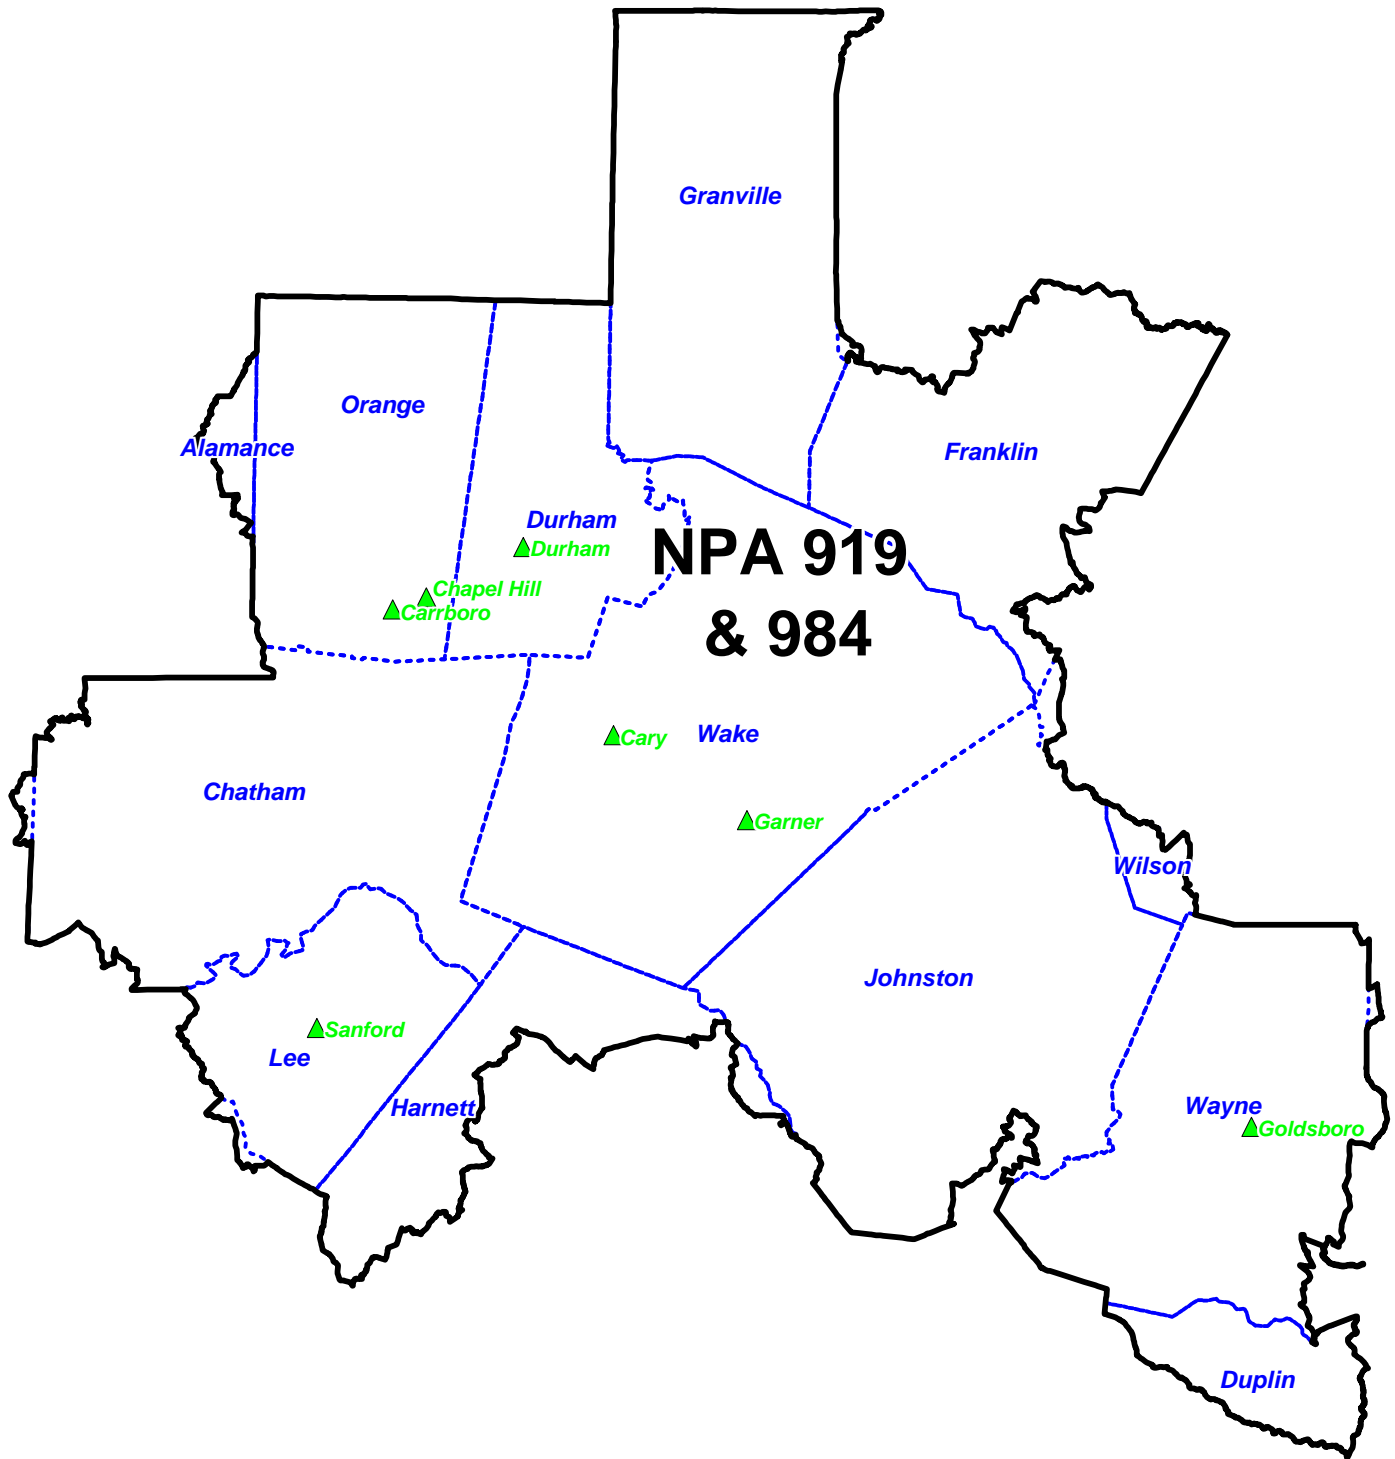

NXX codes within the 984 NPA may be assigned to service providers after September 6, 2001, but assigned codes may not be activated prior to March 6, 2002. All assignable 919 NXX codes must be utilized before a code in the new 984 NPA can be assigned.
