NANPA System and Website Update

NANPA is developing a new system, which combines the existing NANP Administration System (NAS), Pooling Administration System (PAS) and Routing Number Administration System (RNAS) into a single system. The existing NANPA, Pooling and RNA websites will be combined into a single website, the new URL will be www.nanpa.com.

Service providers have the option to use a:

- 1) REST API interface to submit its NRUF, thousands-blocks forecasts, thousands-blocks requests, CO code requests, 5XX-NXX requests, CIC Access and Usage Report(s), and p-ANI requests; or
- 2) SFTP interface to submit its NRUF, thousands-blocks forecasts, thousands-blocks requests, CO code requests and CIC Access and Usage Report(s).

If your company plans to use the REST API interface or SFTP interface, notify NANPA at support@nanpa.com. Any company that previously notified NANPA, no further action is required.

Below are the key milestones and dates associated with the new system and website.

Key Milestones

Q1 2024: Service Provider API Testing

Q2 2024: Service Provider SFTP Testing

Q3 2024: External Training for New System and Website

September 30, 2024: New User Registration Begins

October 28, 2024: New NANP Administration System (NAS) and NANPA Website (www.nanpa.com) Launches
